

Requirements:

Browser use

Browser-use is the easiest way to connect your AI agents with the browser.

GitHub Links

Browser-use/web-ui: <https://github.com/browser-use/web-ui>

Go to cmd

- **pip install browser-use**

```
C:\Users\radhi>pip install browser-use
Defaulting to user installation because normal site-packages is not writeable
Collecting browser-use
  Downloading browser_use-0.1.39-py3-none-any.whl.metadata (8.3 kB)
Requirement already satisfied: httpx>=0.27.2 in c:\users\radhi\appdata\local\programs\python\python311\lib\site-packages (from browser-use)

Playwright is an open-source automation library for browser testing and web scraping developed by Microsoft

- playwright install

```
C:\Users\radhi>playwright install
Downloading Chromium 133.0.6943.16 (playwright build v1155)
wload/playwright/builds/chromium/1155/chromium-win64.zip
140 MiB [=====          ] 24% 35.2s|
```

We are going to use gemini api

LLM stands for Large Language Model, a machine learning model that can process and analyze natural language. LLMs can perform tasks like translation, classification, and generating text. They can also answer questions and identify datapatterns.

Create a folder on desktop name – AI AGENT

- **cd Onedrive**
- **cd desktop**
- **cd AI AGENT**

```
C:\Users\radhi>cd desktop

C:\Users\radhi\Desktop>cd AI AGENT
The system cannot find the path specified.

C:\Users\radhi\Desktop>cd AIAAGENT
The system cannot find the path specified.

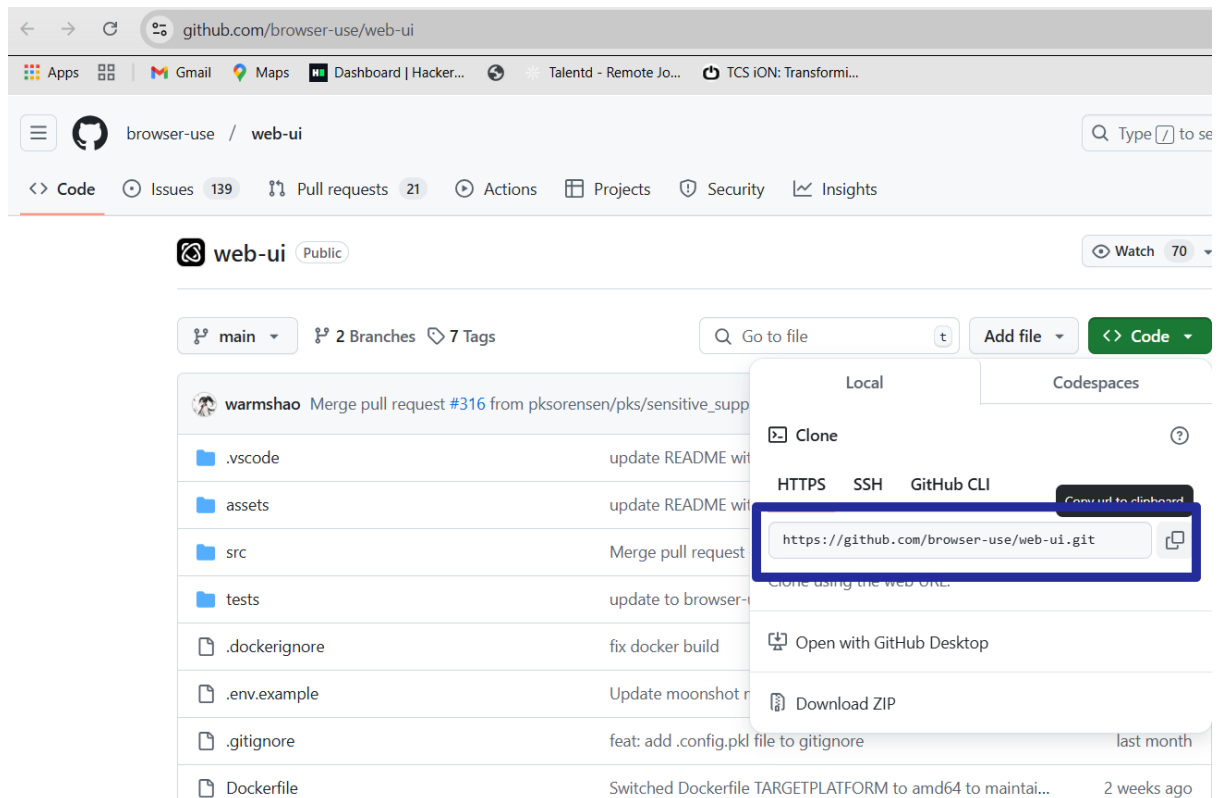

C:\Users\radhi\Desktop>cd ..

C:\Users\radhi>cd Onedrive

C:\Users\radhi\OneDrive>cd Desktop

C:\Users\radhi\OneDrive\Desktop>cd AI AGENT

C:\Users\radhi\OneDrive\Desktop\AI AGENT>|
```

- `git clone https://github.com/browser-use/web-ui.git`

```
C:\Users\radhi\OneDrive\Desktop\AI AGENT>git clone https://github.com/browser-use/web-ui.git
Cloning into 'web-ui'...

Introduction about UV

An extremely fast Python package and project manager, written in Rust.

A single tool to replace pip, pip-tools, pipx, poetry, pyenv, twine, virtualenv, and more.

Provides comprehensive project management, with a universal lockfile.

Runs scripts, with support for inline dependency metadata.

Installs and manages Python versions.

Installation

Install uv with our official standalone installer:

macOS and Linux

Windows

```
$ powershell -ExecutionPolicy ByPass -c "irm https://astral.sh/uv/install.ps1 | iex"
```

- **powershell -ExecutionPolicy ByPass -c "irm https://astral.sh/uv/install.ps1 | iex"**

Now we will create the virtual environment

- **uv venv --python 3.11**

```
C:\Users\radhi\OneDrive\Desktop>cd AI AGENT
C:\Users\radhi\OneDrive\Desktop\AI AGENT>cd web-ui
C:\Users\radhi\OneDrive\Desktop\AI AGENT\web-ui>uv venv --python 3.11
Using CPython 3.11.9 interpreter at: C:\Program Files\Python311\python.exe
Creating virtual environment at: .venv
Activate with: .venv\Scripts\activate
```

To activate virtual environment

```
C:\Users\radhi\OneDrive\Desktop\AI AGENT\web-ui>.venv\Scripts\activate
(web-ui) C:\Users\radhi\OneDrive\Desktop\AI AGENT\web-ui>|
```

How to check either the virtual environment is activated or not

In prefix we can see the (web-ui) then the virtual environment is activated

Install Dependencies

Install Python packages:

- `uv pip install -r requirements.txt`

```
(web-ui) C:\Users\radhi\OneDrive\Desktop\AI AGENT\web-ui>uv pip install -r requirements.txt
Resolved 159 packages in 5.54s
  Built html2text==2024.2.26
  Built pyperclip==1.9.0
* Preparing packages... (144/158)
pydantic-core 1.19.0 MiB/1.89 MiB
```

Install Playwright:

- `playwright install`(Already installed)

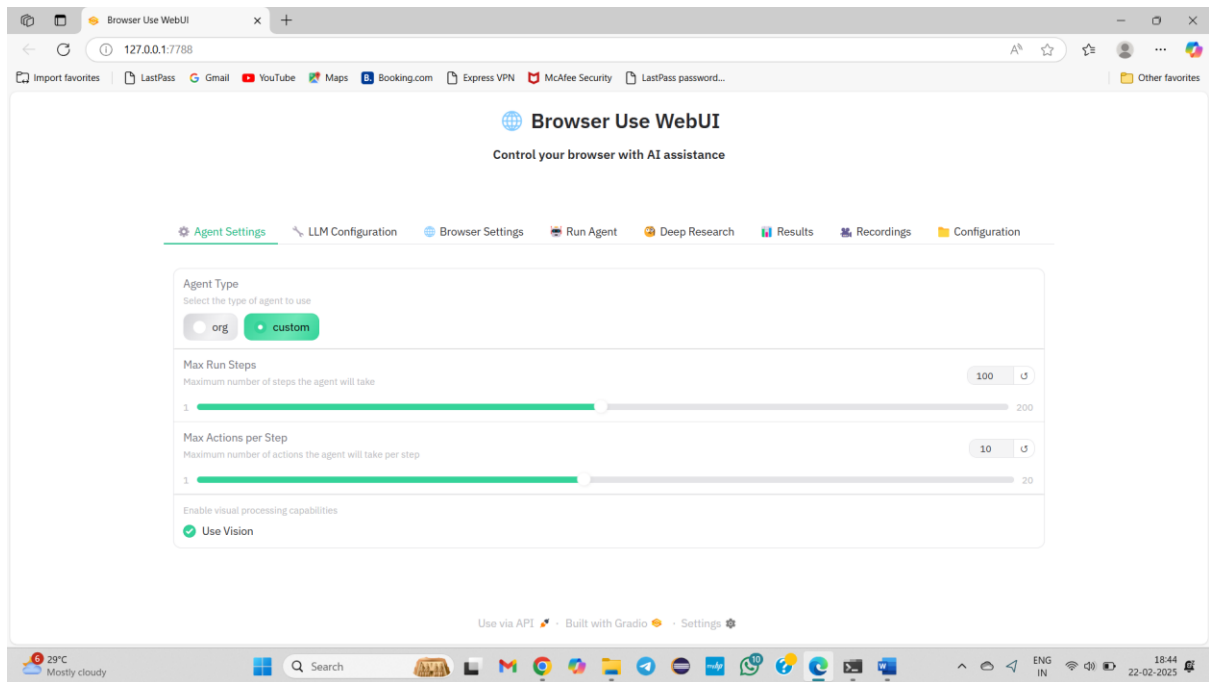

Local Setup

1. **Run the WebUI:** After completing the installation steps above, start the application:

- `python webui.py --ip 127.0.0.1 --port 7788`

```
(web-ui) C:\Users\radhi\OneDrive\Desktop\AI AGENT\web-ui>playwright install
(web-ui) C:\Users\radhi\OneDrive\Desktop\AI AGENT\web-ui>python webui.py --ip 127.0.0.1 --port 7788
INFO     [browser_use] BrowserUse logging setup complete with level info
INFO     [root] Anonymized telemetry enabled. See https://docs.browser-use.com/development/telemetry for more information.
* Running on local URL:  http://127.0.0.1:7788

To create a public link, set 'share=True' in 'launch()'.
|
```

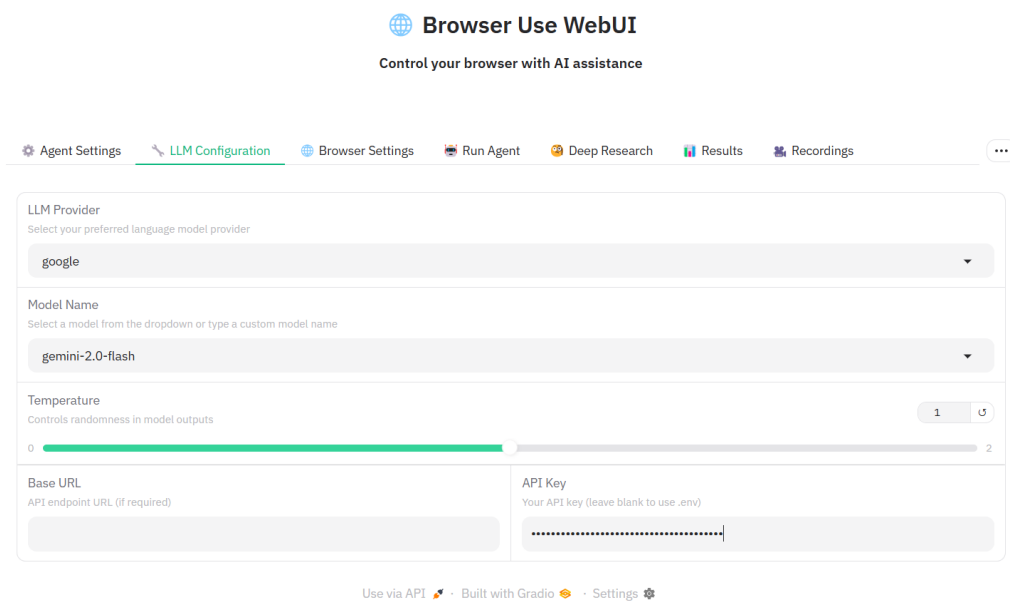

First Configure LLM

Take LLM API

google studio ai→GET API KEY→CREATE API key→Gemini API→
AlzaSyAJ_LwMPAVBFImOMuEJuK5PAkCPwDw2l0U

Enter above key im API Key in LLM

Browser Use WebUI

Control your browser with AI assistance

Agent Settings LLM Configuration Browser Settings **Run Agent** Deep Research Results Recordings

Task Description

Describe what you want the agent to do

go to google.com and search for who is the founder of instagram

Additional Information

Optional hints to help the LLM complete the task

Add any helpful context or instructions...

Run Agent

Stop

Waiting for browser session...

INFO [src.agent.custom_agent] Result: Kevin Systrom and Mike Krieger are the co-founders of Instagram.

radhikapunnam1@gmail.com, AI Event Invitation, Dear Radhika,

I hope this email finds you well.

I am writing to invite you to an exciting AI event that we are hosting. The event will feature insightful talks from industry l
nd networking opportunities. I believe this would be a valuable opportunity for you to learn more about the latest trends in AI
ssionals in the field.

The event is scheduled to take place on [Date] at [Time] in [Location]. Please let me know if you are able to attend.

Best regards,
Radhika Punnam
